20 TC NEEDLE HOLDER

TC = TUNGSTEN CARBIDE

An extremely durable metal, that is harder than most common suture-needles! This inlay increases the longevity of our needle holders dramatically. The inlays are able to change.

The gold-plated handle indicates TC inserts.

CUSTOMER TITAN-PIN-SET

68-780-018

Titan-Pin-Set, complete

SET INCLUDES:

TITAN-PINS

68-620-003

Titan-Pins, 3mm, 10 pcs.

INFO

Suitable mallet 67-660-150
(see page 98)

APPLICATOR

- Single-piece instruments to collect the pins from the holding tray therefore the twisting of the working tip during the operation is excluded.
- Very ergonomical and comfortable Grip for a safe operation of the Titan-Pins

68-650-000

Applicator, for pins 68-620-003, 15,5cm

HOLDING TRAY

- Functional Design
- safe and easy to operate with single hand principle
- Box can contain up to 15 Titan-Pins

68-720-008

Box for 15 Titan-Pins

68-780-016

Bone-Fixation-Set, Titan,
1,2mm / 1,4mm Ø

**CONTENTS:**

- 68-720-002 Box for Micro-Screws Ø 1,0/ 1,2/ 1,4mm
- 68-740-002 Screwdriver, 11cm, Fig. 2
- 68-760-102 Blade, cross, self-retaining, 60mm length, for 68-740-002
- 68-510-014 Pilot drill, Ø 1, 0mm, 14mm
- 68-512-014 Pilot drill, Ø 1, 2mm, 14mm
- 68-112-008 Titanium, Ø 1,2mm, 8mm length, cross, 10 pcs.
- 68-115-004 Membrane Screws, selfcutting, 4mm, 10 pcs.

MATCHING ITEMS:**Accessories:**

- 68-720-002 Box for Micro-Screws Ø 1,0/ 1,2/ 1,4mm
- 68-740-002 Screwdriver, 11cm, Fig. 2
- 68-760-106 Blade, cross, self-retaining, short, for Contra-Angle HP

Pilot Burs:

- 68-510-014 Pilot drill, Ø 1, 0mm, 14mm
- 68-512-014 Pilot drill, Ø 1, 2mm, 14mm
- 68-514-014 Glide Hole drill, Ø 1, 4mm, 14mm

Micro Screws (10 pcs. per Pack):

- 68-112-006 Titanium, Ø 1,2mm, 6mm length, cross, 10 pcs.
- 68-112-008 Titanium, Ø 1,2mm, 8mm length, cross, 10 pcs.
- 68-112-011 Titanium, Ø 1,2mm, 11mm length, cross, 10 pcs.
- 68-112-013 Titanium, Ø 1,2mm, 13mm length, cross, 10 pcs.
- 68-114-006 Titanium, Ø 1,4mm, 6mm length, cross, 10 pcs.
- 68-114-008 Titanium, Ø 1,4mm, 8mm length, cross, 10 pcs.
- 68-114-011 Titanium, Ø 1,4mm, 11mm length, cross, 10 pcs.
- 68-114-013 Titanium, Ø 1,4mm, 13mm length, cross, 10 pcs.
- 68-115-004 Membrane Screws, selfcutting, 4mm, 10 pcs.

68-780-010

Bone-Fixation-Set, Steel,
1, 0mm Ø

**CONTENTS:**

- 68-720-002 Box for Micro-Screws Ø 1,0/ 1,2/ 1,4mm
- 68-740-002 Screwdriver, 11cm, Fig. 2
- 68-508-014 Pilot drill, Ø 0, 8mm, 14mm
- 68-110-011 S Steel, Ø 1,0mm, 11mm lenght, cross, 10 pcs.

MATCHING ITEMS:**Accessories:**

- 68-720-002 Box for Micro-Screws Ø 1,0/ 1,2/ 1,4mm
- 68-740-002 Screwdriver, 11cm, Fig. 2
- 68-760-106 Blade, cross, sefl-retaining, short, for Contra-Angle HP

Pilot Burs:

- 68-508-014 Pilot drill, Ø 0, 8mm, 14mm
- 68-510-014 Pilot drill, Ø 1, 0mm, 14mm

Micro Screws (10 pcs. per Pack):

- 68-110-008 S Steel, Ø 1,0mm, 8mm lenght, cross, 10 pcs.
- 68-110-011 S Steel, Ø 1,0mm, 11mm lenght, cross, 10 pcs.
- 68-110-013 S Steel, Ø 1,0mm, 13mm lenght, cross, 10 pcs.

BOX FOR MICRO SCREWS AND ACCESSORIES

- Sophisticated and functional Design
- Integrated ruler for the exact determination of screw and graft lengths (removable)
- Newly-developed Material by Aerospace Engineering
- THERMOSTABLE
- All parts are suitable for machine processing in the thermodisinfectors as well as for all conventional methods, thus corresponding to the latest „RKI - Guidelines“
- Collection tray for all Ustomed screw sizes- diameter (1,0 mm to 1,4 mm)

SCREW DRIVER

- perfect handle length – therefore suitable for all hand sizes
- The ergonomic handle allows a comfortable and fatigue-free operation
- Self-holding mechanism for collecting screws

Foto: Dr. Jan Kielhorn

INNOVATIVE GEOMETRY OF THE MICRO SCREWS

- Precisely milled cross-slit screw head
- all screw types (1,0mm bis 1,4mm) are to be collected with the same blade
- Fast and safe collection of the self-holding micro screws
- Extreme friction between screw head and blade, prevents wear-and-tear
- Much easier removal of debris from the cross-slit (in comparison to inner four-edge or Torx)

Foto: Dr. Stephan Beuer, M.Sc.

TITANIUM MICRO SCREWS

- diameter: 1,2 mm / 1,4 mm
- length: 6 mm / 8 mm / 11 mm / 13 mm

IMPLANT-STEEL ALLOY MICRO SCREWS

- diameter: 1,0 mm
- lengths: 8 mm / 11 mm / 13 mm
- perfectly suited for very small bone grafts and 3D-Augmentations
- special alloy material prevents Osseointegration and therefore a dramatically reduced danger of breaking the screws in comparison to titanium screws of similar lengths

Photo: Jan Kielhorn

Photo: Jan Kielhorn

Photo: Dr. Stephan Beuer, M.Sc.

T-FIX MEMBRANE SCREW

- titanium
- conical threat
- lenght: 4 mm
- self-cutting/self-drilling, no pre-drilling
- perfect for applications in strong cortical bone
- for PTFE and titanium-reinforced membranes

Ø 1,5 mm, 10 pcs.

68-115-004

UMBRELLA-TECHNIQUE BY DR. DR. SCHLEE

IMPLANT-STEEL ALLOY

- diameter: 1,2 mm
- lengths: 8 mm / 11 mm / 13 mm
- screw head diameter: 5 mm
- no Osseointegration

DENTAL STERILIZATION-CONTAINER SYSTEM WITH SAFETY-FILTER

Ustomed's answer to consistently increasing demands for risk minimization, environmental protection and handling comfort, is the newly-developed Easy-Stop System.

The filterless mechanism stops microorganisms even more effectively than conventional filter systems and can be re-used as often as you like. There is no need for consumable purchasing.

To open or close, one handling step is enough:

Simply, press the lid down, and turn!

THE ADVANTAGES SPEAK FOR THEMSELVES:

- The unique lid is almost indestructible:
It is precision-milled from a solid block of aluminum. That way, the lid stays in shape and can withstand the daily office routines.
- Dirt- and germ-repellent
- Fast and residue-free drying during steam-sterilization
- High quality material for triple safety: adhere-free, pore-free and corrosion-free

INFO:

The two-piece aluminum insert in the lid serves as a germ barrier according to the principle of the „Pasteur Loops“. By forming a labyrinth of ring ribs, it therefore reliably separates microbes, germs and particles.

The meandering flow path achieves a decontamination rate of 99.997%

BASIC SURGICAL SET

91-100-001

Basic Surgical Set

Constituent Parts:

02-030-030	Scalpel handle, No. 3
03-441-140	JOSEPH, suture-/gum scissors, 14 cm, cvd.
08-235-160	Tissue forceps, 16cm, str., 1x2 t., v.delic.
10-801-150	COLLEGE, tweezers, 15 cm, serrated jaws
20-470-170	LICHTENBERG, needle holder, 17 cm
24-169-005	LANGENBECK, retractor, size 5, 50 x 11mm
27-717-175	Periosteal elevator, 17, 5 cm, d. e., cvd.
27-741-160	WILLIGER, periosteal elevator, 16 cm, cvd.
67-799-020	HEMINGWAY, bone curette, 18 cm, d/e., size 2
84-224-000	Mouth mirror handle, hexagonal, s.s.
86-153-001	Probe, size 1, single-ended, round handle
90-716-001	Wash Basket, Full-Size, MK 3, cross-wise racks

BASIC IMPLANTOLOGY SET

Constituent Parts:

02-030-030	Scalpel Handle, No. 3
03-441-140	JOSEPH, suture-/gum scissors, 14 cm, cvd.
08-235-160	Tissue forceps, 16cm, str., 1x2 t., v.delic.
10-801-150	COLLEGE, tweezers, 15 cm, serrated jaws
20-710-180	BARRAQUER, TC Micro-Needle Holder, 18 cm, straight, round handle
24-169-004	LANGENBECK, retractor, size 4, 40 x 11mm
27-717-175	Periosteal elevator, 17, 5 cm, d. e., cvd.
27-741-160	WILLIGER, periosteal elevator, 16 cm, cvd.
67-799-020	HEMINGWAY, bone curette, 18 cm, d/e., size 2
73-100-065	Needle and Drill sterilizing box, perforated, 65 x 42 x 8 mm
84-224-000	Mouth mirror handle, hexagonal, s.s.
85-695-012	Periodontal probe, CP 12, colour marking
86-153-001	Probe, size 1, single-ended, round handle
90-716-001	Wash Basket, Full-Size, MK 3, cross-wise racks

„I am using the I'Motion set for about a year. It is working perfectly with 6/0-7/0 threads. Thanks to it's small head and precise lock, I can work with it gently, furthermore, it is extremely rare to tear the thread, owing to it's rounded, smooth shape. It fits easily into narrow places.

PERFECT CHOICE NOT ONLY FOR PERIODONTAL PLASTIC MICRO- SURGERIES!

Dr. Dávid Botond Hangyási

I appreciate the ergonomic and lightweight design of these instruments providing a precise and

CONTROLLED HANDLING EVEN DURING LONG SURGERIES.

Prof. Dr. Adrian Kasaj, DDS, MSc, PhD

DR. MARCO DEGIDI

Adjunct Professor, Postgraduate Program in Clinic Implantology and Biomaterials, University of Chieti. Adjunct Professor, Postgraduate Master in Clinic Implantology, University of Bologna.

Speaker in many national and international seminars, congresses and courses; many national and international publications.

Active member of AO, EAO, ICOI and SIO.

Private Practice in Bologna, restricted to implant surgery & prosthetic.

MR. GIANLUCA SIGHINOLFI

In 1989 Gianluca was awarded his diploma from the Villaggio del Fanciullo in Bologna, Italy. He immediately began work in an important dental lab in Bologna, later to become a partner.

He has had extensive specialist training and conducted courses both in Italy and internationally. Since 1996 Gianluca has collaborated with Dr. Marco Degidi and Prof. Piattelli on immediate loading research, contributing to the development of new surgery protocols and numerous articles on this subject that have been published in leading international reviews and journals.

Speaker in many national and international seminars, congresses and courses; many national and international publications.

surgery and prosthetics clinic, he knows exactly what he's talking about: perfection in practice means perfection for the patient.

TECHNIQUE

When used at implant level, these frameworks support extremely reliable temporary restorations, and rigidly stabilize immediately loaded implants, resulting in a dramatic improvement in implant success rates.

When used at abutment level with purpose-designed DENTSPLY Implants Manufacturing GmbH components, Intra Oral Welding makes it possible to manufacture extremely high quality and durable prosthetics with enormous precision.

The key to the Intra Oral Welding technique is an ingenious welding unit that was developed by the authors in collaboration with DENTSPLY Implants Manufacturing GmbH; the unit makes it possible to create a framework from a series of welds which join abutments to a connecting titanium bar. This quick and simple procedure is completely risk free for both surgeon and patient. There is absolutely no possibility of excessive heat and the procedure causes no discomfort of any sort to the patient. The very high quality of the weld obtained using this form of electrical resistance welding is comparable and often superior to traditional methods (laser, TIG, etc).

91-110-000

Degidi, WeldOne, IOW-Set

detailed information:

www.dentsplyimplants.com

Four implants are placed in the intraforaminal region.

Welding abutments in position.

Intra-orally welded framework.

Welded framework removed and reinforced.

Final restoration.

Post-op X-ray.

Sharp Curver

bends the bar into more acute angles for single abutments.

Soft Curver

bends the titanium bar along the curve of the arch.

**Holder**

grasps and holds the titanium bar firmly in place during the welding process.

Cutter with tungsten carbide inserts easily and efficiently cuts off excess material.
